

Luca's Dual Flicker

This is the first version of the dual flicker effect. It is called dual not only because it provides both constant and random flicker effects but because it can help to create camera flash and lightning effects as well as flash transitions and light strobe effects. It is ideal for customizable and key-framable TV ambient effects. Take a look at the demo video for more details.

Luca

To install the plug-in:

After downloading the plug-in drag it to Macintosh HD / Library / Application Support / Final Cut Pro System Support / Plugins folder. Finally restart Final Cut Pro and the effect should show up in the effects menu.
