# Luca's Intermittent Flash Transition

Luca's Flash Transition plugin for Final Cut Pro provides a variably intermittent flash/lightning transition in between clips. Please take a look at the sample video to see how it can be used. Then download it to play around with the various parameters in order to customize the transition as you wish.

To install the plug-in:

After downloading the plug-in drag it to Macintosh HD / Library / Application Support / Final Cut Pro System Support / Plugins folder. Finally restart Final Cut Pro and the generator should show up in the Generator's menu (Luca's Generators).
