

Luca's Shapes

Luca's Semitransparent Shapes allows the user to apply a variety of shapes directly on the clip or image and customize a number of parameters (See image below). It can be used and misused in many ways; from statistic graphs to quick and easy lower third background it is entirely up to you how and when to use it. Check out the demo below for some suggestions.

To install the plug-in:

After downloading the plug-in drag it to Macintosh HD / Library / Application Support / Final Cut Pro System Support / Plugins folder. Finally restart Final Cut Pro and the generator should show up in the Generator's menu (Luca's Generators).
